

PRIMOthane®

Polyurethane Floor Scrubber Squeegees

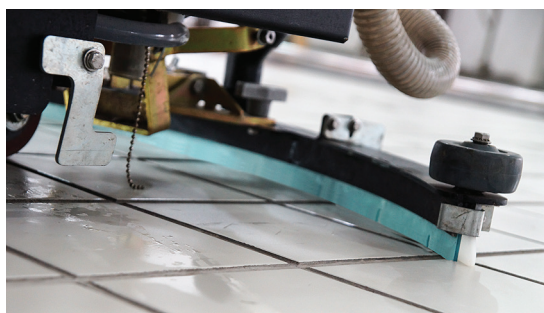

A Clean, Dry Floor in *One Pass*

Using the right squeegee type for the situation will improve your results while reducing costs for both labor and materials. Of all the components in a floor scrubber system, the squeegee is the most important—it's the last thing that touches the floor.

PRIMOthane is 100% polyurethane. It is custom formulated for the floor care industry to achieve high oil and chemical resistance along with excellent abrasion resistance on all types of floor surfaces.

PRIMOthane is a premium urethane squeegee material and it delivers superior resistance to oils and chemicals, keeping its shape where most rubber will warp and fail.

In demanding conditions, PRIMOTHANE quickly pays for itself by delivering consistent cleaning results. It's unique polyurethane technology resists wear and retains a sharp edge longer, reducing the need for frequent adjustments and replacements—improving your productivity.

PRIMOthane®

PRIMOthane is ideal for demanding floor cleaning applications. It is a synthetic polymer that has been formulated with a wide range of properties, including with ideal characteristics for use in harsh floor cleaning environments.

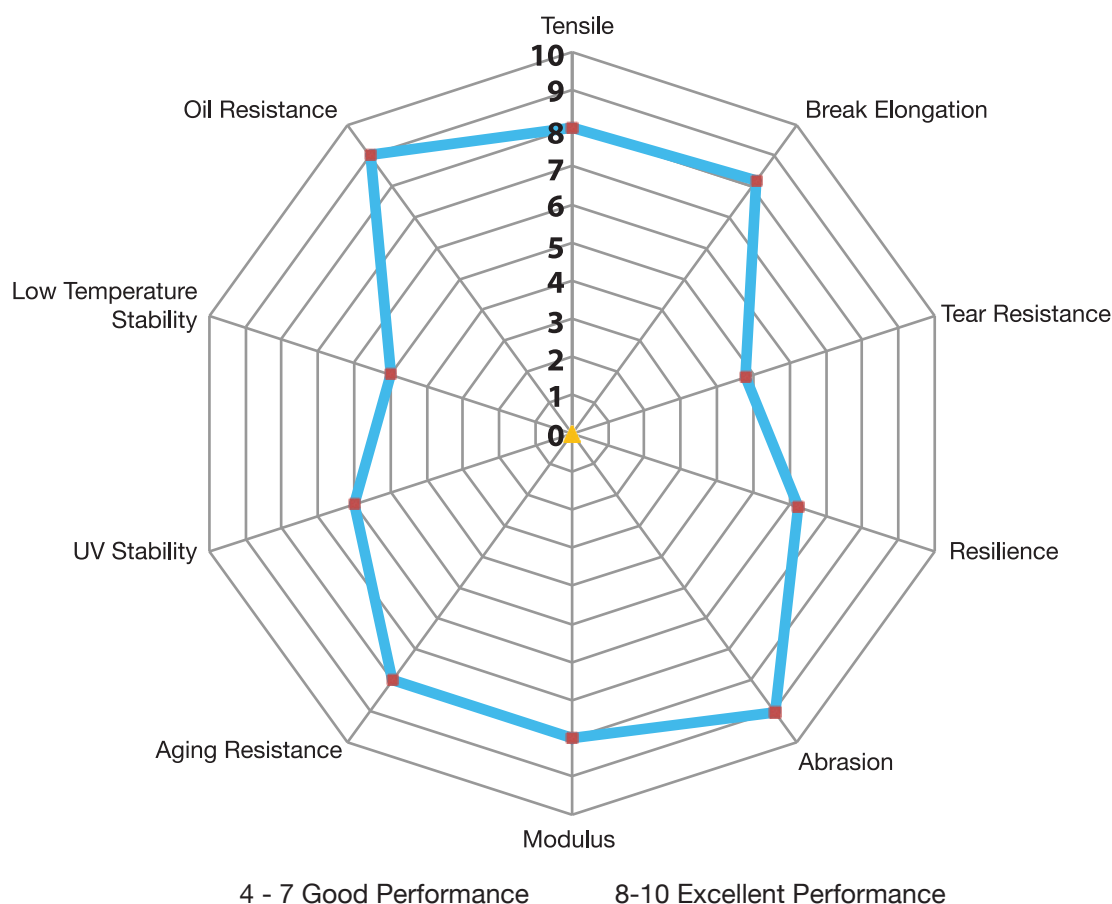

In controlled testing at our research facility, PRIMOthane demonstrated the following performance benefits for our customers:

- High oil and chemical resistance
- High abrasion resistance
- Excellent tensile strength
- Excellent surface contact
- Excellent life span

PRIMOthane PERFORMANCE

	TEST STANDARD	PRIMOTHANE
Hardness (ShA)	ISO 48-1994	38
Modulus 500% (MPa)	ASTM D412	2.21
Tensile (MPa)	ASTM D412	12
Break Elongation (%)	ASTM D412	680%
Abrasion (mg/40M)	DIN-53516	90
Tear Resistance (N/mm)	ISO 34-2004	18
Specific Gravity	BS 903: Part A1: 1995	1.2
Resilience (%)	ISO 4662	50
Working Temperature (°C)		10° to 40°C
